

LCC minutes.

February 18th, 2016

Present: Rosalind Page "RP"
Robert Cook "RC"
Betsy Stead "BS"
Mark Roberts "MR"

Absent: Phyllis Armstrong "PA"

Quorum present: Yes

Public attendance: Judy Tumosa (Bath CC)
Bruce Burnham (Bath CC)
Pauline Corzilius (Lisbon Science teacher)

1. Minutes of Jan 2016 mtg. BS/RP approved by all
2. Plan of Development. Judy Tumosa and Bruce Burnham from Bath Conserv Commission explained the Natural Resource Inventory (NRI) process that Bath went through and offered assistance as we start our process. Pauline Corzilius from the Lisbon Regional School has several students who are interested in working on this with us and Pauline herself has a significant amount of expertise that she is willing to share.

Discussion continued around the idea of using our maybe most significant natural feature, the Ammonoosuc River and its tributary streams as the framework for our NRI work. Examples of a study and questionnaire conducted by the town of Haversham were discussed with an idea of outreach to town residents to determine their input.

Also RP to research having Amanda Stone from the UNH Taking Action for Wildlife come to talk to us, maybe with Lyman and Landaff CC

There are maps available already on the NH wildlife action plan that RC will try to print out and have laminated by Pauline`s class to use at the town meeting as part of an outreach table which RC and any others who can attend will participate in.

3. Next meeting Thurs March 17th. Pauline agreed to attend as part of our followup discussions about the NRI process
4. Meeting adjourned at 6 pm.
